Multiservice 802.11n Wired/Wireless Wall Switch

## The First High Performance 802.11n Integrated Wired/Wireless Wall Switch

The Ruckus ZoneFlex 7025 is the industry's first wired and wireless wall switch that integrates high-speed 802.11n Wi-Fi into an ultra-sleek, low-profile design that can be quickly and discretely installed in a standard wall junction box.

Ideal for offering converged services within hotel guest rooms and university dormitories, the ZoneFlex 7025 provides an easy way to offer multiple connections into a single room without multiple cables.

The ZoneFlex 7025 delivers high performance 2.4GHz 802.11n wireless coverage and four wired Ethernet access connections that can be used to support a range of in-room IP device and user connectivity options. An additional pass-through port allows connectivity for digital phones that requires native access to an in-house PBX system.

An IEEE 802.3af-compliant POE port, up to 15.4 watts, powers devices such as IP telephones directly from the wall switch. The ZoneFlex 7025 requires only a single POE cable drop thereby reducing cabling, switch ports, and power sourcing equipment.

The ZoneFlex Wi-Fi Wall Switch is completely inconspicuous, minimizing the protrusion off the wall to make in-room cabling and furniture arrangement simple. Flexible deployment options allow the ZoneFlex 7025 to be easily installed via two uplink Ethernet options: an RJ-45 Ethernet jack or a 110 punch down block connection.

The ZoneFlex 7025 can be deployed as a standalone device or centrally managed by the Ruckus ZoneDirector or FlexMaster Wi-Fi system management platform.

With the ability to broadcast up to eight SSIDs per device, the ZoneFlex 7025 supports port-based VLANs. Authentication options include: 802.1x, MAC-based, captive portal, LDAP, RADIUS, Active Directory and through an internal user database.

## BENEFITS

### Ubiquitous connectivity

In-room device provides complete wired and wireless connectivity for a wide range of devices and applications

### Converged IP services

Multiple SSIDs, port-based VLANs and robust authentication options make the ZoneFlex 7025 ideal for supporting concurrent IP-based services such as VoIP, IPTV, high-speed Internet access and in-room device connectivity

### Standalone or centrally managed

The ZoneFlex 7025 can be deployed in standalone mode or centrally managed by the Ruckus ZoneDirector or Ruckus FlexMaster systems

### Superior, fast Wi-Fi connectivity

802.11n system delivers ultra high-speed connectivity and extends coverage in-room and beyond

### Flexible deployment options

The ZoneFlex 7025 requires a single POE cable drop, reducing cabling, switch ports and power sourcing equipment

### Easy installation

Installs into any standard network wall jack, offering two Ethernet uplink options: RJ-45 connector and a 110 punch down block

### Sleek, inconspicuous compact form factor for best aesthetics

Low profile design and front port access eliminates unsightly cabling and disruptive furniture placement

### Integrated POE support eliminates more wires

Provides POE out to power devices such as IP-based VoIP phones eliminating the need for more power chords that clutter the environment

### Plug and play for existing digital phones

Pass-through port allows native connectivity for existing digital phones
